

HTML Verbal Video Assignment

Subject: Web Development Fundamentals | Duration: 2-3 Minutes

Instructions

- Record a video of yourself speaking for 2 to 3 minutes.
- Explain the HTML concepts below in simple, clear language.
- You may speak in Hindi or English.
- Speak clearly and with confidence.
- You may use notes, but avoid reading everything word-for-word.

1. What is HTML?

Cover the following points in your video:

- Full form of HTML
- Why HTML is used in web development
- Importance of HTML as the foundation of every webpage

Example: "HTML stands for HyperText Markup Language. It is used to create the structure of web pages."

2. Basic Structure of an HTML Document

Explain the purpose of each tag below:

Tag	Function
<code><html></code>	Root element — wraps the entire HTML document.
<code><head></code>	Contains meta-information not visible on the page.
<code><title></code>	Sets the title displayed on the browser tab.
<code><body></code>	Holds all visible content of the webpage.

3. Common HTML Tags

Explain any 5 of the following tags with a brief example for each:

Tag	Function
<code><h1></code>	Defines the main/largest heading on a page.

<code><p></code>	Defines a paragraph of text.
<code></code>	Embeds an image into the webpage.
<code><a></code>	Creates a hyperlink to another page or resource.
<code></code>	Creates an unordered (bulleted) list.
<code></code>	Defines an individual list item.
<code>
</code>	Inserts a line break within text.

4. Why HTML is Important

- HTML provides the structure of every website on the internet.
- HTML works together with CSS (styling) and JavaScript (interactivity).
- Every webpage — no matter how complex — is built on an HTML foundation.

Submission Guidelines

Format	MP4
Duration	2 – 3 minutes
Language	Hindi or English
Quality	Clear audio and video

How to Submit

Send your completed video assignment directly to the HelpLine number below. Make sure your video is in MP4 format and is between 2–3 minutes long before sending.
